TechTV's Best of CES Winners

Twelve products receive top honors at CES 2002.

LabRats and other TechTV judges combed the Consumer Electronics Show floor in Las Vegas this week to uncover the best products of 2002. For three days, the judges worked around the clock -- testing and evaluating everything from cellphones and cameras to high-end audio devices -- looking for the most innovative gear at CES.

By Wednesday, the field had been whittled down to 36 [Best of CES finalists](#), three in each of 12 categories. Today, we announce the individual winners in each category plus one Best of Show -- the single best product exhibited at CES 2002.

Congratulations to TechTV's Best of CES winners.
